

2024 Technical Specifications

Hardware Requirements

Speak Agent runs as a web app on devices with a screen size of 7" & up or as a native app for iPhones®, iPads® and Android phones or tablets. It supports both hardware keyboards and touch-screen devices. Headphones or earbuds are useful, but not required. A built-in or external microphone is required for the speaking component, but not for the listening, reading, writing, or visual components.

Software Requirements

The web app runs in the following web browsers without any plug-ins or extensions:

- Chrome (recommended)
- Edge
- Firefox
- Safari

Application Requirements

- The web app may be accessed at <https://teach.speakagent.com> with a direct login or by using Clever District SSO or ClassLink. (See SSO on next page.)
- JavaScript must be enabled in the user's web browser.

Network Connectivity and Filtering

- Speak Agent requires internet connectivity. All digital activities work well in low-bandwidth environments and can be used concurrently by an entire classroom.
- If you use domain filtering, please allow these two domains: (1) ***.speakagent.com** and (2) **lexemes*.herokuapp.com**. If either is blocked, the app will not function.
- To use our video content (optional— mainly for grades K-5), you may either (a) allow YouTube or (b) allow a list of specific video URLs that we submit to you.

Accessibility and Language Supports

Our current WCAG 2.1 compliance level and accessibility guidance may be found at the following URL: <https://www.speakagent.com/accessibility>. A VPAT is available upon request.

Email Communications

Speak Agent, Inc. must from time to time communicate with teachers and staff in order to provide its services and support. Therefore we ask that you specifically allow emails from the domain **speakagent.com** so that they are not blocked or sent to spam.

- All teacher communications (excepting support ticket responses) are opt-in unless the district authorizes an opt-out approach, in writing.
- At your option, data reports may be emailed to staff on a recurring basis.
- Teachers may also opt-in to emailed reporting.
- Speak Agent, Inc. does not send email to or contact students/families.

Privacy Policy and FERPA

- Please refer to our [Privacy Policy](#) and [Terms of Service](#).
- Speak Agent, Inc. is a signatory of [Student Privacy Pledge 2020](#).

SSO

Speak Agent supports District SSO (Single Sign-On) through both Clever Instant Login and ClassLink SSO. You may invite us to connect on Clever to see if your Clever sync matches our required fields. If there is not a match with the data you provide, we can discuss an alternative unique identifier.

Rosters

- Speak Agent supports the OneRoster v1.1 data sharing standard, including exports from PowerSchool.
- User account setup, configuration, and course enrollment is handled by Speak Agent.
- For multi-campus orders, we provide a way to securely share rostering data with us by AWS SFTP or ClassLink RosterServer on a daily or weekly frequency, as you choose.
- Speak Agent supports automated updates to rosters if you share data that conforms to the OneRoster data standard.
