

2021 Technical Specifications

Hardware Requirements

Speak Agent runs on devices with a screen size of 7" & up or as a native iOS app for iPhones and iPads. It supports both hardware keyboards and touch-screen devices. Headphones or earbuds are useful, but not required. A built-in or external microphone is required for the speaking component, but not for the listening, reading, writing, or visual components.

Software Requirements

The web version runs in the following web browsers without any plug-ins or extensions:

- ▶ Chrome
- ▶ Edge (v14 or higher)
- ▶ Firefox
- ▶ Safari

Application Requirements

- ▶ The web version runs at <https://teach.speakagent.com>. Users may access it with a direct login or with Clever District SSO. (See next page.)
- ▶ JavaScript must be enabled in the user's web browser.

Network Connectivity and Filtering

- ▶ Speak Agent requires internet connectivity. All digital activities work well in low-bandwidth environments and can be used concurrently by an entire classroom.
- ▶ If you use domain filtering, please allow the domains ***.speakagent.com** and **lexemes*.herokuapp.com**.
- ▶ To use our video content (optional — and mainly for Science & Early Grades), you must either (a) allow YouTube or (b) allow a list of video URLs that we submit to you.

SSO

Speak Agent supports District SSO (Single Sign-On) through Clever Instant Login. You may invite us to connect on Clever to see if your Clever sync matches our required fields. If there is not a match with the data you currently provide, we may be able to offer alternative user identifiers.

Rosters

- ▶ Speak Agent supports the OneRoster v1.1 data sharing standard.
- ▶ User account setup, configuration, and course enrollment is handled by Speak Agent.
- ▶ For multi-campus orders, we provide a way to securely share rostering data with us by sFTP or ClassLink RosterServer on a daily or weekly frequency, as you choose.
- ▶ Speak Agent supports automated updates to rosters if you share data that conforms to the OneRoster data standard.

Assignments

- ▶ With purchase of a *Teacher Support Bundle*, Speak Agent offers three options for managing assignments: (1) automated, (2) teacher-managed, and (3) hybrid.
- ▶ In the automated model, digital lessons are automatically assigned to students enrolled in a course based on your course pacing guide using an agreed-upon release schedule.
- ▶ In the teacher-managed model, all assignments are made by teachers for individual class sections or students.
- ▶ In the hybrid model, we provide automated assignments, but allow teachers to add, remove, or archive them to customize learning paths and differentiate instruction.

Privacy Policy and FERPA

Please refer to our [Privacy Policy](#) and [Terms of Service](#).

Speak Agent, Inc. is a signatory to the Student Privacy Pledge 2020.
