

Hardware

Speak Agent runs on any device with a screen size of 7 inches or above.* It supports both hardware keyboards and touch-screen devices. Headphones or earbuds are useful, but not required. A built-in or external microphone is required for speaking activities, but not for listening, reading, or writing.

* The teacher portal is optimized for desktop and laptop computers.

Software

Speak Agent runs in the following web browsers without any plug-ins or extensions:

- Chrome
- Edge v14 & above
- Firefox
- IE 11
- Safari

Network Connectivity and Filtering

Speak Agent requires an active internet connection. It is designed to work in bandwidth-constrained environments and can be used concurrently by an entire classroom.

If you use domain filtering, you may need to whitelist the domains ***.speakagent.com** and **lexemes*.herokuapp.com**. If your implementation includes video content, which is often hosted on YouTube, we can submit a list of video URLs for your approval and whitelisting.

Single Sign-On (SSO)

Speak Agent supports single sign-on through **Clever InstantLogin**. Other SSO and LMS integrations are available upon request.

Privacy Policy and FERPA

Please refer to our [Privacy Policy](#) and [Terms of Service](#) on [speakagent.com](#).

I'd love to talk to you!
